Macro wrap: India Inflation

- India's consumer prices increased 2.36 percent year-on-year in July 2017, beating market expectations of 1.87 percent and following a 1.54 percent gain in the previous month. Cost of housing, energy and clothing rose further and food prices fell at a softer pace
- Prices grew at a faster pace for: Fuel and light (4.86 percent from 4.54 percent), clothing and footwear (4.22 percent from 4.17 percent) and housing (4.98 percent from 4.7 percent).
- Cost of food fell at a slower 0.29 percent after declining by 2.12 percent in June. While prices of vegetables fell less (-3.57 from -16.53 percent in June) and fruits inflation was higher (2.83 percent from 1.98 percent), cost of pulses declined further (-24.75 percent from -21.92 percent).

Macro wrap: Industrial Production

- India's industrial production decreased 0.1 percent year-on-year in June 2017, following an upwardly revised 2.8 percent rise in the previous month and missing market expectations of a 0.6 percent gain
- It was the first fall in industrial production since June 2013, as manufacturing output declined 0.4 percent after rising 2.6 percent in May
- Meanwhile, electricity production grew 2.1 percent (from 8.3 percent in May) and mining output increased 0.4 percent (from 0.2 percent in May).

Debt Market Wrap

Liquidity – remains comfortable; call rate stable

- The interbank call money rate settled at 5.85% on August 11 as against 6.05% on July 7
- Through the auctions, the central bank drained away Rs 1,65,000 crore and kept the call money rate from dipping too low
- The central bank also conducted two term repo auctions of 14-day and 13- day durations for a total notified Rs 41,500 crore
- Brief tightness in liquidity was on account of outflows related to indirect tax payments and payments for gilts purchased in the previous week's bond sale

Bond Yields: yields on 10 year bond stable

- In line with consensus expectations, RBI lowered the key policy rate by 25 bps to 6.00% at its Third Bi-monthly Monetary Policy Statement, 2017-18, even as it maintained a 'neutral' stance
- The yield of the 10-year benchmark 6.79% 2027 paper settled at 6.50% on August 11 as against 6.53% on July 7
- Sentiment remained subdued on concerns that the RBI may conduct further open market bond purchases in the coming weeks, given surplus liquidity in the banking system
- Ongoing geopolitical tensions between US and North Korea as well as the continued standoff between India and China also dented sentiments

Debt Market Outlook

View: Yields expected to be Range bound

- India's consumer prices increased 2.36 percent year-on-year in July 2017, beating market expectations of 1.87 percent
- Repo rate cut which happened against an underlying 'neutral monetary policy stance' reinstates the belief that future course of policy actions would be heavily data dependent
- Bond prices are expected to be range bound in the near term

Strategy: Prefer Short term Funds & Corporate bond Funds

- We would suggest a mix of 80:20 allocation mix between short term/corporate Fund (80%) and Gilt/long term Fund (20%; play through dynamic bond fund)
- Long dated Fixed Maturity Plans could also be considered as an alternative for a part of the allocation in the Short Term Fund category

Recommendations & Performance- Corporate Bond Fund

Scheme Name	Exit Load	Simple Annualised (%)					CAGR(%)		
		14D	1M	3M	6M	1Yr	2Yr	3Yr	5Yr

Annexure: Criteria for scheme selection

- Selection among the top-rated AMCs with a proven track record in debt
- Selection out of this lot, unless a strategy is compelling based on interaction with an AMC outside this universe
- Track record of at least two years of existence for the fund, though there could be some exceptions at times
- Threshold AUM of at least Rs.200 crore and above, though at times strategy would merit consideration as an exception
- Superior risk-adjusted returns
