Punter's Call

Gold – Bullish Bias

MCX Gold price traded positive by +0.12% in today's trading sessions signals bullish outlook in the market. The breakout from the "Rising Channel" along with price closed above the trendline support level of Rs 118,900 reinforces the continuation of the bullish trend. The key resistance level is identified at Rs 120,600 level. A above this level could trigger fresh upside rally target set at Rs 121,680 & Rs 122,811 level (fresh all time high) in near term. The momentum indicator reinforces the bullish outlook indicating that bullish momentum may continue to build in the upcoming trading sessions.

Crudeoil – Sell on Bounce

Crude oil price traded -0.30% negative in today's trading sessions. The downward trendline breakdown and price trading below 20 DEMA suggest short term trend is bearish. Despite, minor upside pullback the price is trading below its key resistance at Rs 5600 level. If the price sustains below 5600 level (middle bollinger band) can trigger further downward movement target set at Rs 5320 & Rs 5150 level in near term. The negative crossover in the indicator suggests bearish momentum in upcoming trading sessions.

Aluminium – Buy on Dips

MCX Aluminium price is moving in strong uptrend by forming higher high higher low within rising channel. Despite, minor downside pullback the metal price has taken support at lower level. The key support is identified at Rs 256 level (78.6% of previous rise). If price sustain above Rs 256 level a strong buying opportunity, with potential upside targets at Rs 262.30 & Rs 266.80 level in near term. The momentum indicator supports the bullish momentum in upcoming trading sessions.
